Work Experience

○ 2022 - 2023

Singularity.IS - software dev

During my time at Singularity.is, I contributed to several high-profile projects that required strong problem-solving skills, attention to detail, and the ability to work collaboratively with cross-functional teams. For example, I was instrumental in developing a real-time chat application using React, Node.js, and Socket.io that allowed users to communicate with each other seamlessly.

○ 2023 - 2024

Visualtravel - Project lead

While working for a company called Visualtravel, I single handedly build a complex CRM tool customized for the needs of this company. It is quite a complex software which includes AI for voice recognition, automatic AI analysis based on the weekly work, features for managing products and tasks inside of this company. Technologies used: React, Django, Flask, MySQL, Vosk AI models.

○ 2023 - 2024

Freelance on Fiverr and Upwork

As a freelance full-stack web developer on Fiverr, I successfully collaborated with diverse clients to deliver tailored web solutions. Proficient in both front-end and back-end development, I designed and implemented responsive, user-friendly websites that met the unique requirements of each project. My responsibilities included understanding client needs, proposing technical solutions, and delivering high-quality code within specified timelines. I honed my skills in problem-solving, communication, and adaptability while managing multiple projects simultaneously.
